**RESPONSE TO OFFICE ACTION**

Sir:

**Compliance of 37 CFR 1.178**

The Examiner stated at item 1 of the Office Action that “[t]he original patent, or a statement as to loss or inaccessibility of the original patent, must be received before this reissue application can be allowed.”

In response to the Examiner's statement at item 1 of the Office Action, and in accordance with 37 CFR 1.178(a), attached hereto is an OFFER TO SURRENDER ORIGINAL LETTER PATENT. Accordingly, it is respectfully submitted that since no outstanding matters remain regarding this Reissue Application, and each item of the Office Action has been fully satisfied, allowance and issue of this Reissue Application are earnestly solicited.

**Comments on Statement of Reasons for Allowance**

**Under 37 C.F.R. § 1.104**

The Examiner provided a Statement of Reason for Allowance in the Office Action mailed February 1, 2005, in which the Examiner indicated that “the prior art of record does not teach or

Serial No.: 10/722,167

Amtd. Dated:

Comments on Statement of Reasons for Allowance of February 1, 2005

suggest a surface potential changing unit comprising a light emitting element emitting light in a first direction; and a guide member spreading and reflecting the light toward the photosensitive drum in a second direction to direct the emitted light to the surface of the drum.”

As specified in MPEP 1302.14, “care must be taken to ensure that such reasons are accurate, precise, and do not place unwarranted interpretations, whether broad or narrow, upon the claims.” It is respectfully submitted that the Examiner’s Statement is not an accurate quote with respect to each of the allowed claims, and instead, raises “possible misinterpretations, and possible estoppel effects” (MPEP 1302.04) and accordingly, should be disregarded.

The Examiner’s statement appears to unnecessarily limit the claims to a surface potential changing unit comprising a light emitting element emitting light in a first direction; and a guide member spreading and reflecting the light toward the photosensitive drum in a second direction to direct the emitted light to the surface of the drum. While being useful in understanding the invention, the Examiner’s comments could lead to an unwarranted and unnecessary narrowing interpretation of the claims. Therefore, it is further submitted that the claims should not be interpreted based on the Examiner’s statement.

It is further submitted that the claims are not constrained by such device limitations and that the claims speaks for themselves as to what features are included therein and are their own best evidence as to the reasons for allowance thereof.
